

CSETI Member Contact, Australia 2001

PRESS RELEASE

DISCLOSURE PROJECT

FOUNDER TO SPEAK

IN DENVER

CSETI Group Contact, Virginia 2006

Steven M. Greer MD, founder and director of The Disclosure Project (www.DisclosureProject.org) will be speaking in Denver in the Turnhalle Room at the Tivoli Student Union building on the Auraria Campus on Thursday, June 18, 2009 from 7:00 to 10:00 pm.

Dr. Greer launched the world-wide Disclosure movement to end UFO secrecy and is currently advising members of Congress, foreign heads of state, and figures very close to the Obama Administration on how to best control currently illegal classified projects related to UFOs. These projects, which are embedded within a number of military, intelligence and corporate operations, have been managed without the oversight of Congress or the President of the United States since at least the late 1950s.

At his keynote address in Denver on June 18, 2009, Dr. Greer will review past briefings with world leaders and outline current Disclosure Project initiatives to brief those in Washington and other world capitals on the UFO subject.

Dr. Greer has provided briefings for the Director of the Central Intelligence Agency, the Director of the Defense Intelligence Agency, the Director of Intelligence for the Joint Chiefs of Staff, and many members of Congress, among others. For the most part, these senior leaders have been systematically denied access to projects connected to the UFO subject.

Vancouver Island, BC 1981

Dr. Greer states, "These projects have been managed illegally for over 50 years and as such constitute a grave threat to our US national security. The central reason for the secrecy is directly connected to the corrupting influence of special interests in the oil, energy, and financial sectors, since the Disclosure of the sciences related to UFO energy and propulsion systems would quickly end our addiction to oil and coal. This secrecy, aside from being illegal, has denied humanity wondrous new sources of energy generation that would rapidly solve the environmental and energy crises. In this sense, the reason for the secrecy is simple: old fashioned greed and lust for power..."

Recently, Dr. Greer has been working with senior members of a G7 country to initiate open contact with the extraterrestrial civilizations that are responsible for some of the UFO sightings around the world. This historic breakthrough will be reviewed at the Denver presentation, and a workshop on the CSETI contact protocols will be held on Saturday, June 20, 2009, also at the Tivoli Student Union building on the Auraria Campus, from 1:30 to 6:00 pm.

CSETI Member Contact, Outer Banks NC 2009

The public is invited to both events.
